

Recommended Childhood Vaccination & Check up Schedule 2008

This chart gives guidelines for children who are 13 years old and younger. Vaccinations are very safe and can help prevent certain diseases. If you think your child has missed any shots or if you have any questions, schedule a visit with your doctor.

Age ►	At Birth	2 Weeks	1 Month	2 Mths	4 Mths	6 Mths	9 Mths	12 Mths	15 Mths	18 Mths	24 Mths	30 Mths	3 Years	4-6 Years	11-12 Years	13 Years & Up
Check up	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	Once a year check up
